NEW GENERATION WRITABLE SURFACES

PolyVision eCeramicSteel writing surfaces are ideal for office and tertiary spaces, providing a super-smooth writing surface that erases like magic and won’t scratch, stain or fade for as long as it is in use – guaranteed.

PolyVision eC is the exceptional writing surface for whiteboards and chalkboards, providing superior writability, durability and erasability.
CeramicSteel Whiteboard Surfaces

With different enamel formulations, various colours of CeramicSteel can be produced. No matter the colour, all CeramicSteel adheres to the same strict standards and is fired in the range of 700 – 900 ºC (1292 – 1652 ºF), resulting in a beautiful, accurate colour that will not scratch or fade over time.

CeramicSteel Chalkboard Surfaces

PolyVision’s e³ CeramicSteel Chalk Surface has a superior, low-gloss, matte finish that readily accepts chalk providing a sharp, unbroken line with less pressure and maximum surface adherence.

Features

- Can be written on with dry-erase, semi-permanent, water-soluble or permanent marker, chalk, pen or crayon
- Optimum erasability — no ghosting and easy to maintain
- Scratch, bacteria, chemical and fire resistant — will not combust or release toxic fumes in the event of fire
- Greater colour contrast
- 99.9% recyclable and Cradle to Cradle Certified™ Silver
- Standard and premium colour finishes available
- Colourfast — will not fade
- Safe and clean, releases no harmful chemicals into the environment
Our eVision
Specifying Cradle to Cradle Certified™ products ensures that PolyVision’s materials live up to the world’s toughest standards for human and environmental health. PolyVision e³ CeramicSteel is safe and clean, contains no VOCs and is 99.9% recyclable.

Don’t forget, specifying PolyVision e³ CeramicSteel is a healthy business move. Our surfaces will help you deliver competitive differentiation in the marketplace and meet the growing demand for green building practices. It leads the market in quality and sustainability — so you can, too!
