

Zone.

Zone is a modern swivel chair with a great price-quality ratio.

Finishes and colours

Zone chairs are available in two colours – black, perfect for classic offices, or white, for calmer spaces.

The Zone chair is AFRDI certified.

A perfect solution for those seeking ergonomic and economical chairs, Zone has a range of intuitive features and adjustments to ensure the user's comfort.

Adjustable arm-rests

Height adjustable arm-rests allow for a neutral position that comfortably supports the wrists and forearms. Arm-rests are equipped with soft pads providing additional comfort. A wide adjustment range of 60mm in height and 35mm front to back enables users to set the arms to suit their preference.

Seat-depth adjustment

The seat-slide mechanism enables users to adjust the depth of the seat pan (by 50mm) to fit their body. This guarantees optimal comfort for all users and eliminates the need for "special" seat pans to accommodate very tall or short staff.

Synchro self-adjusting

Zone utilises the latest technology in active, self-adjusting mechanisms. The resistance of the synchronous back and seat motion automatically adjusts according to the weight of the user, providing a balanced reclining action that requires no adjustment by the user.

Lumbar support

More than just a plastic strip, our padded lumbar support provides superior comfort and maximises back and pelvis support. The lumbar support is easily adjusted for height from a seated position.

Seat-height adjustment

The clearly marked height-adjustment lever is located in a readily accessible position and adjusts the seat height from 440 - 515mm.

Seat profile

A perfectly shaped seat with waterfall front edge guarantees maximum comfort, reduces pressure on thighs and improves circulation.

Mesh back-rest

Zone incorporates an active high-tensity elastic mesh that is stretched across the frame to provide flexibility, breathability and comfort.
