Design and Comfortability

Who said beautiful design and comfortable sitting experience cannot happen at the same time? In Okamura philosophy, these two concepts do not contradict; they interconnect.

Design Story Behind the Name

What contours Zephyr is inspired by smooth, curving lines of nature. Most visible is its back design. Some see a fin, while others see flower stem in it. Yet, the chair blends into urban working environment effortlessly. And as the name goes, Zephyr is all about wind-clad flowing design.
Zephyr: It’s All about Back!

The aluminum bracket has sophisticated shine, and is covered with ABS glossy dressing board.

Without being overly flashy, this creates a subtle, yet eloquent feel to your space. Not just being easy on the eye, the bracket holds BIFMA-approved strength.
Zephyr Follows Okamura Philosophy, Bringing You a Total Ergonomic Satisfaction

Zephyr is a design product for a good balance of ergonomic comfort and the design. If you want to make both factors happen at the same time, the answer is here, easily within your reach.

**Adjustability**

- **Seat Height Adjustment**: Seat height can be adjusted in 80mm range with a right lever underneath the seat.

- **Seat Slide Adjustment**: Seat depth can be adjusted in the range of 50mm back and forth with a left lever underneath the seat.

- **Reclining Adjustment**: Reclining angle can be smoothly adjusted in five positions with a left lever underneath the seat.

- **Armrest Height Adjustment**: Armrest height can be adjusted in 90mm range up and down with a 3D arm or in 80mm range up and down with a 4D arm.

- **Armrest Angle Adjustment**: The up and down (1D), angle (2D), back and forth (3D), and right and left (4D) positioning of the arm pads are adjustable.

- **Armrest Left/Right Adjustment**: The arm pads can slide left and right in the range of 30mm. This helps support the arms and less build up of fatigue.

- **Arm Pad Forward and Backward Adjustment**: The arm pads can slide forward and backward in the range of 35mm (4D) or 60mm (3D). This helps support the arms and less build up of fatigue.

**Frame Color**

- **White**
- **Black**

**Cloth Color Variation**

- **BACK (Mesh)**
- **SEAT (Cushion)**

**Options**

- **Armrest**: 4D Adjustable armrest
  - You can adjust the (1D), angle (2D), back and forth (3D), and right and left (4D) positioning of the armrests.

- **Lumbar Support**: Can be adjusted up and down in 50mm range.

- **Headrest**: Can be adjusted up and down to various angles for the best comfort.
