Design

Fully ergonomic for any seated task, Ankle Tilt® Reclining adapts to the body's natural movements. This pivots the chair at a point near the sitter's ankle, enabling the back and seat of the chair to slide together. This feature supports a natural posture, so there is no strain on the upper legs, even when the occupant reclines.

Environmental features:
- Designed to be durable
- Made from recycled materials (58% by product weight)
- GREENGUARD Certified
- 93% recyclable
- Main components labelled and easy to disassemble to aid recycling

Backrest design: Mesh / Cushion

Options and Features

Ankle Tilt Reclining®
Ankle Tilt Reclining® allows the user to adjust the reclining angle with a lever on the lower left hand side of the seat. Tilt tension force can be adjusted by rotating a knob on the front right of the seat.

Seat Height Adjustment
Seat height can be raised or lowered 100mm with a lever on the right side of the seat.

Seat Slide Adjustment
Seat depth can be adjusted 50mm back or forth with lever positioned to the front left corner of the seat. The seat slide range is from 420mm - 470mm deep.

Arm Rest Height Adjust
Arm Rests can be adjusted while seated with a gentle pull upwards. A height of 80mm is available in 20mm increments.

Arm Pad Angle Adjust
Arm pads can be adjusted to an inward angle of 60° and outward angle of 30° with a gentle twist.
